

Mold Base Technology

Innovative custom mold base designs that enhance your productivity

Only StackTeck offers you the flexibility to choose a mold design that can start as a single face mold and that can later be converted to a multi-level mold (2,3 or 4 level) to meet your growing productivity demands.

Complimentary features such as our Valveless Melt Transfer System (VMTS), modular Quick Product Change (QPC) and integrated ejector mechanisms can be designed into your mold base to simplify operation, increase productivity and allow you a building block approach to your tooling needs.

StackTeck's mold base markets include, but are not limited to, the following:

- Food Packaging
- Industrial Packaging
- Housewares
- Consumer Goods
- Medical and Pharmaceutical
- Personal Care and Cosmetics
- Caps and Closures
- Electronics
- Automotive
